

C. CLINICAL AND LABORATORY DATA

- 18) Fever or recent history of fever Yes No
- 19) Haemorrhagic tendencies manifested by
- (a) positive tourniquet test Yes No
 - (b) petechiae Yes No
 - (c) ecchymoses or purpura Yes No
 - (d) bleeding from mucosa Yes No
 - (e) bleeding from gastrointestinal tract Yes No
 - (f) bleeding from injection sites Yes No
 - (g) others (specify)
- 20) Evidence of plasma leakage manifested by
- (a) pleural effusion Yes No
 - (b) ascites Yes No
- Other
- 21) liver enlargement Yes No
 - 22) was there shock at any stage? Yes No
- shock is suggested by:** rapid, weak pulse & pulse pressure < 20mmHg
OR hypotension & cold, clammy skin and restlessness

D. CLINICAL AND LABORATORY DATA

Investigation	Highest value		Lowest value		Office use only
	Date (dd/mm)	Value	Date (dd/mm)	Value	
23) Total WBC count	<input type="text"/> /	/mm ³	<input type="text"/> /	/mm ³	
24) Platelet count	<input type="text"/> /	/mm ³	<input type="text"/> /	/mm ³	
25) Hb	<input type="text"/> /	g/dL	<input type="text"/> /	g/dL	
26) PCV	<input type="text"/> /	%	<input type="text"/> /	%	

Results of serological investigations for DF/DHF

Test	Date of collection of blood (dd/mm)	How many days after the onset of illness?	Result (✓)		
			Positive	Negative	Inconclusive
27) Ig M	<input type="text"/> /				
28) Ig G	<input type="text"/> /				

- 29) Where was the serological investigation done?
- 1. government laboratory
 - 2. private laboratory

E. DIAGNOSIS

- 30) Initial clinical diagnosis:
- 31) Final diagnosis:

F. TYPE OF IV THERAPY

- 32) Platelet transfusion
- 33) Blood transfusion
- 34) Colloid solution or FFP

Final diagnosis:	<u>Classification</u>
Compatible with	DF <input type="checkbox"/>
DF/DHF case	DHF I <input type="checkbox"/>
definition?	DHF II <input type="checkbox"/>
	DHF III <input type="checkbox"/>
Yes <input type="checkbox"/> No <input type="checkbox"/>	DHF IV <input type="checkbox"/>
